

Enstar Australia Limited

Enstar Australia Limited specialises in acquiring and managing insurance and reinsurance businesses in run-off and providing capital solutions to insurance and reinsurance clients, including Australian and global companies, both live and in run-off.

Our key objectives & strategy

We aim to be a strategic partner to our clients, working as one team to provide balance sheet solutions and to allow clients to focus on what they do best – running their core businesses. We achieve this by combining local expertise with the ability to call on our colleagues throughout the Enstar group world-wide.

Our services

Working in partnership with clients we identify and quantify legacy exposures and structure transactions to redeploy capital. Transactions include the transfer of liability through reinsurance, portfolio transfer and equity purchase.

We work closely with our fellow Enstar companies throughout the world to structure solutions to meet each client's specific needs.

We provide consultancy solutions including claims reviews, commutations and reinsurance asset collection services to live and run-off companies.

We provide a full range of support services for companies underwriting in Australia including accounting, actuarial, administration, claims support, risk & compliance, IT & system services and financial reporting. Based in Sydney, we can either provide these services remotely or we can accommodate our clients' underwriting staff at our central business district location.

Our track record

Enstar Australia Limited was formed in 2008 to manage Gordian RunOff Limited and affiliated companies. We manage a large portfolio of business for both Enstar group companies and third party clients in Australia and globally.

Our run-off professionals have a wealth of experience and industry contacts and have been actively involved in the major global markets and with all significant claims issues.

As we have grown, we have developed significant in-house expertise spanning all insurance disciplines including financial, actuarial, legal and technical matters.

Key facts

- We provide end to end management of asset and liability portfolios for both Enstar group companies and third party clients.
- We have developed unique system and risk management products, specifically tailored to the Australian regulatory environment.
- We have concluded numerous Division 3A portfolio transfers, substantially reducing ongoing regulatory costs and enabling the return of excess capital to shareholders.
- Our clients are some of the region's most prestigious insurance and reinsurance companies.

> Enstar Group Limited brings global expertise to identifying, quantifying and rapidly releasing capital.
